THE EC SERIES FOR PCB IS A COMPACT EMERGENCY STOP SWITCH WITH A 22 MM PANEL CUT-OUT. PRODUCT DESIGNERS NOW HAVE A SAFE MOUNTING FOR A PCB EMERGENCY STOP SWITCH WHEN DEVELOPING COMPACT CONTROL PANELS WITH LIMITED BEHIND-PANEL SPACE.

EC series for PCB

MARKET FIRST PCB MOUNTED EMERGENCY STOP THAT GUARANTEES A HIGH SAFETY LEVEL: an extra locking ring keeps the 2 parts together and avoids a floating mount.

CORE TARGETS

THE EC SERIES FOR PCB IS PARTICULARLY SUITABLE FOR MOBILE APPLICATIONS:

- AGVs
- Belly box controllers
- Remote controls

CUSTOMER BENEFITS

- This emergency stop switch is very easy to install: no wiring, to save time during mounting.
- It has been developed to ensure greater safety: 2 poles and a locking ring, unique on the market.
- The super compact dimensions and low panel depth make it the ideal emergency stop switch for applications where a compact design is required.
- UL and CE certified.

END-USER EXPERIENCE

- Safety product for compact applications: the EC series can be used on mobile applications thanks to its compact dimensions and allows the user to benefit from safety everywhere it is needed.
- The green visual indicator clearly shows the switch status. The end user feels more secure when given easy access to crucial information.

MAIN FEATURES

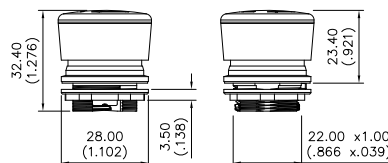

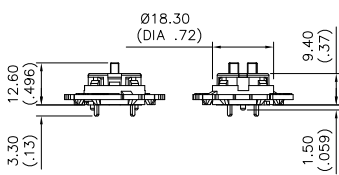

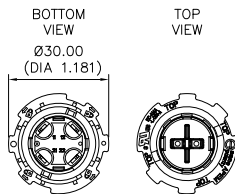

- Compact
- Resists vibration
- UL certified
- 2 poles for greater safety
- PCB mounted

TECHNICAL FEATURES

FOR A SAFE PCB MOUNTING
Just rotate the ring counterclockwise to lock the lower and upper parts together.

Extra locking ring

AGENCY APPROVAL

UL 60 947-5-1
IEC 60 947.5-5
UL 60 947.1
CSA C22.2 N°60 947-5.1.14
CSA C22.2 N°60 947.1.13
